

The Real Cost of Bottled Water

See How Our Bottleless Coolers Compare

We know there's a lot that goes into the decision making process when choosing your workplace water provider, including the financial and environmental costs. That's why we created this calculator comparing the different options. So, you can better determine which solution is best for your business. Thank you for using our tool, and we hope you share the results!

> Ready to save money and the environment? Go bottleless with Quench! At Quench, enhancing the sustainability efforts of our customers is a core value of our service. We help our customers eliminate the use of bottled drinking water delivery services and the incumbent fossil fuel depletion, carbon emissions, and additional plastic waste by filtering a building's existing water supply at the point-of-use (POU) via a bottleless water cooler. Visit our website to learn more about our filtered water dispensers or call <u>1-888-877-0561</u> to speak to one of our Quench Water Experts.
