

# Filtered Water On-Demand for Peak Gym Performance

Proper hydration plays a crucial role in maintaining optimal performance and overall well-being during and after workouts. Electrolyte-enhanced water helps replenish essential minerals lost through sweat, while the mineral-infused and electrolyte-enhanced quenchWATER+ promotes efficient water absorption in the body. Your gym, health club, yoga studio, martial arts dojo, dance studio, and aquatic center can improve staff and clients' hydration by offering quenchWATER+ through an innovative Quench water cooler.

Don't forget ice! Ice machines are essential in gyms not only for keeping drinking water cool, but also for post-workout recovery and injury management. Bin ice machines are excellent for storing ice for recovery ice plunges, cryotherapy, and icing sore muscles.

Many people find the taste of plain water unappealing and often resort to adding flavour packets to enhance its taste. Quench machines, offer a range of 0-calorie, flavoured water options, alleviating this need. Additionally, the installation of flavoured sparkling water options can enhance the post-workout experience. Sparkling water aids in rehydration, craving satisfaction, and digestion.

## The Fitness Industry's Most Trusted Filtered Water Provider

As the leading water-as-a-service solution for fitness, we serve gyms nationwide, ensuring member hydration and satisfaction. Quench's sustainable water machines offer opportunities for gyms by differentiating them from competitors, attracting eco-conscious consumers. Additionally, providing clean water, ice, and sparkling options promotes health and wellness, encouraging hydration and supporting overall well-being. With unparalleled service and support, we implement sustainable water solutions to meet the growing demand for eco-friendly amenities in the fitness industry.
